

Internet Based Computing

Ev Chambers
Ikinect LLC

What Does It Do

- Allows you to connect to your software via the internet
- Allows you to share;
 - remote desktop synchronous
 - Controlled access asynchronous
- Provides the hosted server and all the technical support that goes with it

How Does It Work?

- The technology is very good and literally is improving every day
- The functionality is affected by;
 - internet connection
 - effectiveness of the backroom support
 - the software you are running
 - knowledge and comfort level of the user

Advantages

- Support!
- Support!
- Support!
- Accessibility
- Ease of Sharing
- Easy Channel to Ancillary Technology

How Do I Get It?

- Ikinect a company- Formed to provide this technology to agriculture
- Principals- Doug Schilling, Trey Stober, Ken Wedig, Ev Chambers
- We have had the system running several years and have 25+ users on regularly
- We will set you up and let you test thoroughly at no cost or obligation

Cost?

- It Doesn't Cost! It Pays!
- Yes, there are fees
