

Smart Feeder Data Mining

Norm Brown

Objectives

- What's in there
 - System setup and optimization
 - User Defined Report design
 - Running, saving and transferring reports
 - Special reports
- 

Data Records

TransAction Plus

- Purchases
- Sales
- Buy & Dispense Feed
- Feed into inventory
- Buy & Dispense Drugs
- Drugs into inventory
- General ledger

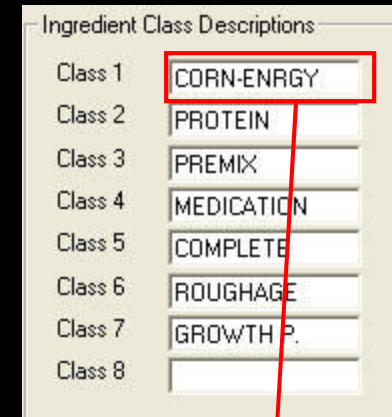

Smart Feeder

- Death loss
- Animal Movements
- Feed Movements
- Feed from inventory
- Weight-value entries
- Feed inventory
- Drug & medication
- Treatments

Feed Ingredient Hierarchy

- Class

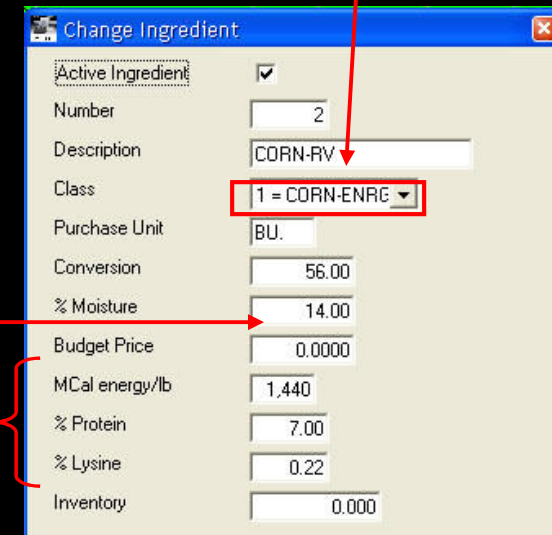

- Based on NPPC guidelines
- “Safest” way to select feed in reports

Ingredient Class Descriptions	
Class 1	CORN-ENERGY
Class 2	PROTEIN
Class 3	PREMIX
Class 4	MEDICATION
Class 5	COMPLETE
Class 6	ROUGHAGE
Class 7	GROWTH P.
Class 8	

- Ingredient

- Pools by feed bank
- Moisture for D.M. calculation
- Nutritional values

Change Ingredient	
Active Ingredient	<input checked="" type="checkbox"/>
Number	2
Description	CORN-RV
Class	1 = CORN-ENERG
Purchase Unit	BU.
Conversion	56.00
% Moisture	14.00
Budget Price	0.0000
MCal energy/lb	1,440
% Protein	7.00
% Lysine	0.22
Inventory	0.000

Feed Ration Hierarchy

- Ration Type

- Easiest way to roll up feed consumption by stage or phase

- Ration

- A “tag” only for buy & dispense
- Required to:
 - Track feed by supplier
 - Feed by ticket or ration from Smart Feeder
 - Move feed by ration
 - Ingredient purchases in SF Planning / LifeCycle Budget

Ingredient	Pounds
2 CORN-RV	1,659.63

LifeCycle Budget ingredient purchase

Coding Hierarchy

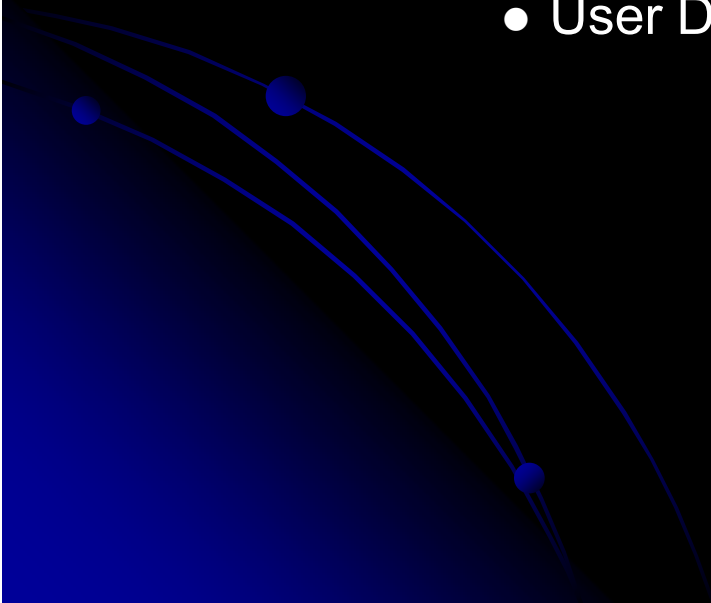

Group Hierarchy

Animal Hierarchy

- Company
 - Center
 - Location
 - Group
 - User Defined Characteristic 1
 - User Defined Characteristic 2

Center Hierarchy

- Production Centers
 - 4 or 5-digit numeric
 - First on list for direct entries
 - Stage sequence:
 - 1nnnn = Breeding
 - 2nnnn = Nursery
 - 3nnnn = Finishing
 - 4nnnn-5nnnn = Wean-Finish
 - 9nnnn = Replacements

Center Hierarchy

- Consolidating Centers
 - 4-5 digit alpha-numeric codes
 - Follows Production Centers
 - Facilities
 - “F” + Production Center number
 - Imported or allocated entries
- Other Support Operations
 - (General Pork, G&A, etc.)
 - Shorter codes so between Production and Facilities

Center Hierarchy

- Service Centers
 - 5-6 digit alpha-numeric codes
 - Last on list
 - Wnnnn = WIP Centers
 - Ennnn = Equipment Centers
 - Tnnnn = Truck Centers
 - Cnnnn = Capital Center
 - NPnnnn = Notes Payable Centers
 - NRnnnn = Note Receivable Centers

Ledger Accounts

- Account ranges by packer

(INC07) Edit Ledger Accounts						
Class	Number	Description	Active	Type	Inc/Bal	Int. Type
1	30110	Tyson Base	A	C	Y	J-1
1	30115	Cargill Base	A	C	Y	J-1
1	30120	Heinold Base	A	C	Y	J-1
1	30130	Swift Base	A	C	Y	J-1
1	30210	Sub Std Tyson	A	C	Y	J-1
1	30215	Sub Std Cargill	A	C	Y	J-1
1	30220	Sub Std Heinold	A	C	Y	J-1
1	30230	Sub Std Swift	A	C	Y	J-1
1	30310	DOA Tyson	A	C	Y	J-1
1	30315	DOA Cargill	A	C	Y	J-1
1	30320	DOA Heinold	A	C	Y	J-1
1	30330	DOA Swift	A	C	Y	J-1
1	30410	Yield \$ Tyson	A	C	Y	
1	30415	Yield \$ Cargill	A	C	Y	
1	30420	Yield \$ Heinold	A	C	Y	
1	30430	Yield \$ Swift	A	C	Y	
1	30510	Lean Tyson	A	C	Y	
1	30515	Lean Cargill	A	C	Y	
1	30520	Lean Heinold	A	C	Y	
1	30530	Lean Swift	A	C	Y	
1	30610	Sort Loss Tyson	A	C	Y	
1	30615	Sort Loss Cargill	A	C	Y	
1	30620	Sort Loss Heinold	A	C	Y	
1	30630	Sort Loss Swift	A	C	Y	

Ledger Accounts

- Handle feed detail in SF Module
 - Class
 - Ingredient
 - Ration
 - Ration Type
- Break Drug/Med. Module by account
 - Vaccines
 - Injectables
 - Water
 - Livestock supplies

Death Loss

- No predefined hierarchy
 - Alpha coding for easiest data entry
 - Reserve “999” (or highest code) for Inventory Adjustment
 - Setting report ranges to the “max” keeps new codes from getting missed

“Ultimate” Group Code

- 12 alpha-numeric
- Year weaned (06)
- Week weaned (42)
- Batch within week (A)
- Stage/Center (427)
- Location (1)
- Sex (B)
- Parity (1)
- Feed Mill (1)

Consistency

- Most existing systems are random
- Use same number of columns for each level
 - Allows wild-carding (21??? for all nurseries on farm 1000)
- Importance reads left->right
 - Allows ranging (07xxxxxxxxxx-07yyyyyyyyyy for all 2007 groups)

Correct

- Can re-label:
 - Divisions
 - Ledger Accounts
 - Centers
 - Location
 - Ingredients
 - Rations
 - Drugs
- Can't re-label groups

Continuous Flow Reports

- Period Summary
- User Defined Period Summary
- Inventory Report
- User Defined Report (by period)
- All clumsy substitutes for group reports
 - No inventory adjustments
 - Must be very careful for date selections
- Practical uses:
 - Continuous flow centers
 - Planning/actual comparisons for feed ingredient quantities/costs

User Defined Report by Group

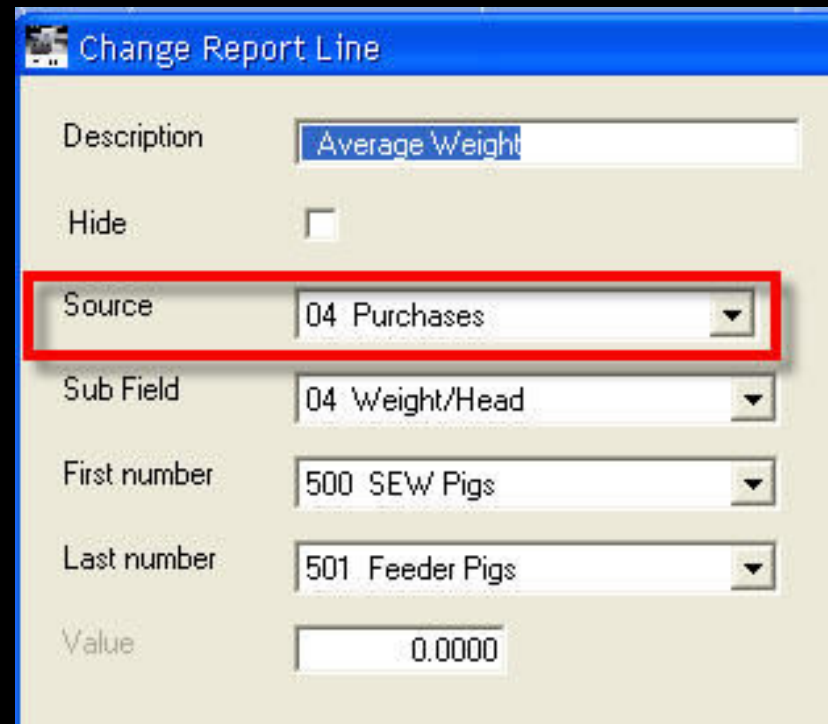

- Objectives:
 - Maximum flexibility
 - Intelligent “canned” report
 - Ease of use
- Result
 - List of options constantly grows based on your input
 - Currently 546 pre-defined and user-defined possibilities

Report Definitions

- Can be “cloned” within companies
- Can be copied between companies
- Current limit is 20 definitions with 210 lines each
- Tempting to continuously modify but exporting to Excel or Dashboard works best with fixed report length
- Therefore, develop a “library” of specialized reports

Source

- Choose which database/data element to include on a report line
- Some sources perform mathematical calculations with other report lines

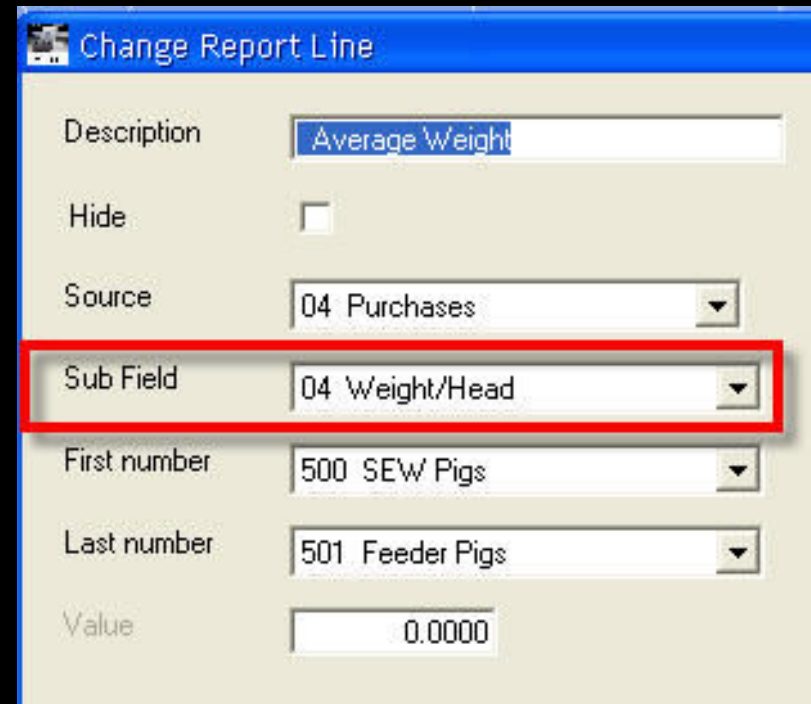

The screenshot shows a 'Change Report Line' dialog box with the following fields:

Field	Value
Description	Average Weight
Hide	<input type="checkbox"/>
Source	04 Purchases
Sub Field	04 Weight/Head
First number	500 SEW Pigs
Last number	501 Feeder Pigs
Value	0.0000

Sub Field

- Determine what calculation, if any, will be performed on the source information
- The selection of sub fields vary based on the source

The screenshot shows a 'Change Report Line' dialog box with the following fields:

Field	Value
Description	Average Weight
Hide	<input type="checkbox"/>
Source	04 Purchases
Sub Field	04 Weight/Head
First number	500 SEW Pigs
Last number	501 Feeder Pigs
Value	0.0000

Range

- Used to select first and last items (ledger accounts, ingredients, death loss causes) to be included in the report

The screenshot shows a software window titled "Change Report Line". It contains several input fields:

- Description: Average Weight
- Hide: ☐
- Source: 04 Purchases
- Sub Field: 04 Weight/Head
- First number: 500 SEW Pigs
- Last number: 501 Feeder Pigs
- Value: 0.0000

The "First number" and "Last number" fields are highlighted with a red rectangular box, indicating the range selection.

Off the NPPC “Reservation”

- 1) **Dead Pounds Produced** = Sum animal days in as days to ending date x number of head for animals moved in + beginning inventory
- 2) **Dead Days In** = #1 x percent died
- 2) **Dead Animal Days** = #1 - #2
- 3) **Calculated Total Weight In** x percent died
- 4) **Dead Pounds Produced** = total pounds produced - #4
- 5) **Live Pounds Produced** = total pounds produced - #5
- 6) **Live Animal Days** = total animal days - #3
