

Only one program covers all your ground.

FARM/TRUST MANAGER PLUS™

The Accounting Solution for Professional Farm Managers and Land Investors.

- ✓ Full client accounting and reporting
- ✓ Automated funds management
- ✓ Generates 4835s & electronic 1099s
- ✓ Crop and asset inventories
- ✓ **NEW**—*ManagerView™* database
- ✓ **NEW**—Electronic Document Management
- ✓ Pooled bank accounts or
- ✓ MICR checks on blank check stock
- ✓ Versions for any size firm
- ✓ Automated management fee calculations
- ✓ Automated interest spreads & sweeps
- ✓ Farm production histories
- ✓ Tracks cash and futures contracts
- ✓ **NEW**—Investor / REIT reports
- ✓ Multi-user / **NEW**—Cloud-ready
- ✓ Accounts for multiple owners
- ✓ Fast budgets and bulk purchases
- ✓ Training and support included

Setting up Farm/Trust Manager Plus

Farm Trust Manager Plus collects and manages information you're probably already keeping in numerous unlinked systems.

You begin by identifying banks, farms, farm managers, farm operators, farm owners and common vendors. Next, you define the relationships between these components. Once this is done, the built-in F/TM intelligence takes over—greatly simplifying data entry and automating internal calculations and reporting.

Farm/Trust Manager Plus includes 2 to 3 days of onsite training with your office staff.

Field	Value	Field	Value
Number	12	Transfer Ledger Account	289 Transfer Ldgr Acct

Second Interest Account	"" none ""		

Buttons: Save, Cancel, Add Owners

The Farm Setup Screen defines relationships between farms, owners, managers and accounts.

Daily activity with Farm/Trust Manager

- The farm management staff opens the mail and attaches a copy of a coding form to each invoice and deposit.
- Farm managers complete the coding or clerical staff can load the information and prepare approval copies for the farm managers to edit and approve.
- The clerical staff complete the daily entry and produce internal reports for management. (The Daily Balance report will be the minimum report for the day.)
- The total clerical time for 100 farms averages 1 to 1½ hours daily and includes entering information and running daily reports for management and quarterly reports for the clients.

Funds management

Farm/Trust Manager Plus automates pooled funds management. All funds may be kept in one bank account, yet the F/TM keeps precise daily inventories of cash by farm. This permits accurate automatic interest calculations by farm from daily interest rates to eight places left of the decimal point. If money is managed by a third-party funds manager, the monthly interest income is automatically assigned to each farm, based on that farm's daily inventory of cash.

Cash information by farm can be reported daily. This report displays four columns of information per farm, bank balance of the interest-bearing account, bank balances of the checking account, accrued management fees, and the total of adjusted bank balances.

Banking regulations in several states do not permit checks to be written from an interest-bearing account. In those states, a checking account can be run parallel to the interest bank account and an automatic sweep will move funds to zero-out the checking account.

Inventory management

All bins and storage centers are set up by location and capacity. Crop is harvested to its storage bin by farm, by crop, and by crop year. Stored inventories are automatically relieved as deposits are recorded.

An inventory commodity-pricing module can pool partial contracts and do accounting for these forward-priced contracts. Remaining inventory can be globally re-priced at current market value for a specific day.

Bulk-purchasing deliveries of seed, fertilizer and chemicals are inventoried in a convenient, systematic way that even accommodates expanded tenant use of this purchasing group.

Easy bulk purchasing requirements

Within reason, the events in agriculture repeat from year to year. A purchasing requirement report can be produced by scanning prior year purchases. This report, with amendments for the current year provides an exceptionally fast way to prepare bulk purchasing requirements. Surface operators frequently add their own requirements to capture bulk pricing. These additional requirements are easily tracked in Farm/Trust Manager.

Fast Budgeting

Monthly or quarterly budgets can be created from last year's actual information and are stored in an Excel format that can be included in monitoring reports.

Other Property

Rental real estate, racing-horse limited partnerships, oil wells and coal interests are just a few of the other properties managed in Farm/Trust Manager.

Reports for managers and clients

Over 35 basic reports, with user-selected versions of each report, give an impressive reporting agenda within the standard product.

Using standard Windows features you will be able to generate modified versions of existing reports, including different fonts, font sizes and column widths. When you move the report the way you want it, you will be able to save it as a print "macro".

Tax information

Schedule "F", 1099s and 4835s are standard. Magnetic tape reporting is available for large-volume filers.

Schedule "F" & 4835 information is also produced for the clients.

One check form for all banks

Farm management clients frequently bring their banking relationships as a part of the deal.

Changing check forms in the printer is a time-consuming task. This software will drive a laser printer with MICR code fonts. That means that the printer will print the entire check on blank stock. The printer will print addresses, logos, the MICR code and approved signatures right along with the usual financial information that all checks contain.

Management fees automatic

All unique management fees are tracked by farm. Gross fees, net fees and any other fee agreement is handled automatically.

Tickler (TO DO) file can

This reminder file can be established by farm. Editing will permit changes at any time. It will roll repeating items forward into the future year.

Networks and multiple sites

Farm/Trust Manager Plus for Windows offers full record-locking and security for multiple work stations and sites using Windows NT, Windows 2000, Windows XP, Novell, Terminal Server or Citrix Metaframe.

Integrated trust information

When the trust department has proprietary software, the farm management information from Farm/Trust Manager Plus is expandable to the mainframe trust software. This permits consolidated reporting for bank management and client tax information. Files will be provided to your bank data processing manager's specifications.

Records to field level

Today's access to global on-the-go yield data can export to field records. Regulated pesticides are required by field for the five consecutive years in some states.

All the standard Crop Audit Plus features, including all costs, harvest and labor can be traced to the individual field by crop and by crop year. This includes the ability to keep EPA records that meets the individual operating standards.

With Crop Audit Plus for Windows, we are now able to link with Precision Farming GIS records.

Customization

If your requirements demand anything not covered in the standard product, our development team will be pleased to quote your special needs.

Farm/Trust Manager Plus for Windows is an open "database" that can be accessed through applications such as Microsoft Access or Crystal Reports.
